Maritime Safety and Security & Post 2020

21-22 November 2017

Porto, Portugal

Outlines

This event is the meanwhile fourth thematic meeting of the 'Knowledge of the seas' network. After the events during 2015-2016 on Blue Growth, Coastal and maritime tourism as well as Blue skills, this event now will focus on Day 1 on Maritime safety and security – approaching the topic, as usual, from four different perspectives.

On the one hand, the first two sessions offer the opportunity to learn more about the topic of maritime safety and security from both the European and sea basin/macro-regional (strategy) perspective as well as the thematic stakeholders and experts' perspective. On the other hand, the event offers the opportunity for (Interreg) programmes to promote how they support maritime safety and security as programmes and through their projects (programme and project perspectives) – and to learn how others do in view of reaching out for possible synergies.

On Day 2, the event will provide an opportunity for the Knowledge of the seas network to hear about the main findings from an informal exchange during August-September with Interreg programmes on the future of maritime cooperation across borders post 2020 – and to discuss the relevant main findings and if and how these could be fed into the post 2020 discussion process.

The target group of this event are on the one hand Interreg Programmes with a maritime character or component, and especially Joint Secretariat staff members dealing with maritime project generation, assessment, monitoring and support. At the same time, the meeting will provide a broader approach also inviting thematic experts and stakeholders as well as project representatives to ensure a holistic view to the topic of maritime safety and security.

Objectives

Originally being a network of only maritime Interreg CBC programmes, the network has been opened up in 2015 for involvement from beyond maritime Interreg CBC programmes depending on the concrete theme on the agenda. The activities of this 'Knowledge of the Seas' network consist of two main components: to jointly RECEIVE knowledge of the seas: sharing knowledge and exchange of experiences, organise seminars, workshops, thematic trainings, and to jointly PRODUCE AND PROMOTE knowledge of the seas: organise seminars, workshop etc., participate in public events as e.g. recently the joint stand at the European Maritime Day 2017 in Poole, United Kingdom.
